-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1795

1. The specification is objected to because the same should include a heading "Brief Description of the Drawing" that appears before the description of the single drawing.

2. The Abstract should be amended to include only up to 150 words.

3. The following is a quotation of the second paragraph of 35 U.S.C.

112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 2, 25-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 should be carefully and completely amended to comply with the requirements of 35 USC 112, second paragraph for the reasons as outlined below.

There is no antecedent basis for "combustion chambers" or "aircraft engine" found in line 6 of claim 1.

The word "process" found in line 9 of claim 1 also does not find proper antecedent basis and this word along with "that takes place in the conventional type combustion chambers" that is set forth in lines 9-10 are unclear because it is not known exactly what applicant intends to claim by using this terminology.

Art Unit: 1795

The terminology "or a type that is comparable in power and temperature level" in lines 13-14 of claim 1 is indefinite since it is not set forth what this type would encompass and would not encompass. Clarification and amendment of the claimed subject matter is required.

The expression "anode side" in line 15 of claim 1 and "cathode side" found in line 17 of claim 1 do not find proper antecedent basis.

Claims 2 and 25-46, dependent on claim 1, fall therewith.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

McElroy et al. teach a fuel cell used in an airplane and Hoffjann et al. disclose utilizing a fuel cell to produce water on an aircraft.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Friday, 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
